
NC-001-Single-Sided

Navigator™ Modular Display System

Print Size: 41" w x 93.75" h

Frame Size*: 36" w x 91.25" h

Live Area: 30" w x 85.25" h

Modular Lineup*: 4.25" in from Frame Size

★: The **frame size** represents the approximate front view of the frame, but will vary slightly due to fabric stretch/finishing. As 2" wrap around the top, left and right sides of the frame (which will NOT be visible from the front), please design to the Print Size and keep all critical art elements such as text/logos within the live area.

★: The **modular lineup** represents the edge of another MDS frame when used side-by-side in the standard baseplate. The 4.25" overlap will only be visible on one of the frames as determined by the frame setup. Please keep critical art elements at least 2" away from the modular lineup when this graphic will be placed behind another MDS frame.

File Preparation Tips

- Design artwork to the Print Size listed (as a rectangle)
- Submit Layered files in their native program (Illustrator, Photoshop, InDesign)
- Supply all image links as separate files to ensure quality
- Keep resolution of all images at a minimum of 100ppi (at full size)
- Include fonts for any live text or convert text to outlines
- Maintain a consistent colorspace between files for artwork and linked images (all CMYK or all RGB rather than a mix of both)
- Critical color matches should be specified as Pantone colors and be applied to art as spot colors
